

IMAD A. SYED
CEO – India and Middle East,
Board Member - PiLog Group

Digital Transformation is causing a lot of disruption in the market as part of fourth industrial revolution that every industry would like to capitalize. As enterprises are seeking to leave digital footprints throughout the world, many players are emerging to bring enterprises to work smartly, online and ease the shifting from traditional ways to digital. With new and better digital platforms and tools being unveiled every day, it is imperative that enterprises keep up to the point with the latest tech to have an edge over competitors. Enterprises are incorporating master data management & governance solutions to have all the business-critical data in a single repository and ensure data consistency across various integrated systems within the business landscape. The whole process is unique and numerous operational requirements need to be followed closely to ensure an accurate approach towards implementation of data management & governance solutions.

If the process is not followed precisely, some changes may lead to inaccurate reporting and wrong decision making for the enterprises, which can be disastrous as data is the new oil in the market. PiLog India Pvt. Ltd., is one of the entities of PiLog Group of companies which addresses the customers' requirements of data management solutions and offers master data management & governance solutions which are of a top-notch quality that empowers the enterprises to run their ERP, CRM, EAM, SRM and Operational systems smoothly and hassle-free.

A SYMBOL OF EXCELLENCE

Established in 1996, PiLog Group is a global group of independent companies, specializing in Quality Data, Digital Governance & Analytical solutions supporting multiple data domains in a variety of industries all over the globe. The PiLog solutions are state of the art, focused on creating a common business language and managing the rules for the creation of high quality, multilingual terminology using Machine Learning, Artificial Intelligence technologies & human-augmented algorithms for our customers who are eager to transform their businesses digitally. PiLog provides exclusive technical dictionaries, industrial libraries with content repositories that is the culmination of research, development, and execution over the past twenty four years embedded into the platform of PiLog Data Quality HUB. All our methodologies, processes, solutions are compliant with international standards for delivering seamless systematic integration of content into various platforms and ERPs such as SAP, S4 HANA, Oracle ERP Cloud, Maximo & MS Dynamics etc.

With two delivery and incubations centers in South Africa and India, the company supports growing demand to its global customers with undisruptive services serving the Middle East, Africas, India, Americas, Europe & CIS regions.

Mr. Imad A Syed, CEO – India & Middle East, Board Member of PiLog Group leads the PiLog entities from the forefront.

He holds a Master's Degree in Computer Science and has more than 19 years of international experience in leading innovation, technology and solution teams for delivering the business value-proposition around the globe. "Challenges had been continual with evolving business cycles with new geographies, services and dynamic customer demands, however our key focus has been on making quick realization of business value-proposition, making customers aware of over-commitment and under-delivery in this competitive market, shark policy made by bigger capitalistic, market penetration and strategic partnerships," states Mr. Imad.

As PiLog serves organizations across the globe, it cut across the world to make value in-roads with strong and transparent cooperate governance and is slowly evolving in making value for people and management dedication with inter-cultural heritage. Building sustainable and long-lasting partnerships by process-driven data management and controls exhibit its unparalleled excellence in the niche. The company is laying roadmap to excel with major ERP/EAM players like SAP, Oracle, Maximo, MS Dynamics etc.
